Manual Handling, Lifting, Carrying and Stacking	3x3=9	Strain, sprains, tendonitis, occupational overuse syndrome, repetitive strain injury, broken bones, back pain, trips, slips	<ul style="list-style-type: none"> Do not attempt to lift an object that is clearly beyond your capability. Get assistance from another staff member When lifting, remember to keep your back straight and bend your knees. Use safe lifting techniques to avoid injury. Take a balanced stance feet placed shoulder-width apart. When lifting something from the floor, squat close to the load. Keep your back in a straight position. Hold the object close to your body. Lift by straightening your legs. Let your leg muscles, not your back muscles, do the work. Tighten your stomach muscles to help support your back. Maintain your neutral back position as you lift. Never twist when lifting. When you must turn with a load, turn your whole body, feet first. Never carry a load that blocks your vision. To set something down, use the same body mechanics designed for lifting. Keep work area clear to ensure there are no hazards which would result in falling or tripping whilst lifting or carrying. Stretching Exercises Training 	1x3=3	01/06/2023
Storage of products	3x4 =12	Crushing, paralyses, death, broken bones, eye or vision loss, brain damage, concussion, cognitive impairment, permanent disfigurement, amputation, severed limbs	<ul style="list-style-type: none"> All stacks must always be straight, as secure as possible and stable. Correct any poor stacking immediately Training Make sure that adequate lighting exists in storage areas. All loads being carried on a tractor must be supported, never exceed the maximum carrying allowances Signage Training 	1x4=4	01/06/2023
